Redesign 2011

Ratio Of Income To Poverty Level In The Past 12 Months (5-year period estimates) 2005-2009

Universe: Population for whom poverty status is determined

NOTE: Data for some geographic areas and/or race groups cannot be displayed because the number of sample cases is too small. An 'N/A' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate. For that reason it is not possible to add the components to reach the total shown.

Geography	Data	Poverty 0-149%	2,009 Total Population	RANGE

Numbers in **BOLD** equal the number of people at or below 149% of poverty.

RANGE:

Low = Number of people below 149% of poverty minus the margin of error divided by total population of the county

Average= Number of people below 149% of poverty divided by the total population of the county

High=Number of people below 149% of poverty plus the margin of error divided by the total population of the county.
